An Böschungen, auf Hängen, Kreisverkehren, Friedhöfen und in Grünanlagen. Die Montage der Pflanzmatte ist sehr einfach. Die Pflanzmatte ist bis zu einer Neigung von maximal 45 Grad einsetzbar. Der minimale Wartungsbedarf hängt vom Systemaufbau ab.

Systemaufbau:

Geranium can. 'Cambridge' Matten

Diese Pflanzmatte besteht aus einer Kokosmatte mit der Bepflanzung Geranium cantabrigiense "Cambridge". Dieser Bodendecker hat einen überschwänglichen Blütenstand und kann gut Sonne vertragen. Bei Lieferung ist die Pflanzmatte zu mindestens 85 % begrünt. Damit ist ein grünes Ergebnis sofort garantiert.

Der Storchnabel, Geranium cantabrigiense "Cambridge", ist ein kräftiger und blütenreicher Bodendecker, der für die Anwendung in Gärten äusserst geeignet ist, aber auch in öffentlichen Grünanlagen kommt dieser Bodendecker schön zur Geltung. Anfang Juni bis weit in den August sorgen die lila-farbenen Blumen für eine ununterbrochene intensive Blüte. Dieser Storchnabel bleibt grösstenteils immergrün. Im Herbst verfärbt sich ein Teil der Blätter rot.
